

3 "quote" → comments, document code | floats & ints
distinct

UW "Test" name

code \rightarrow static, things that
data \rightarrow dynamic

multi-lined text

floats a into
distinct

ints don't have a max value

different int. format

f^u -string

type cast
→ int (var)

f'' "today is {day-name}"

↑
read f

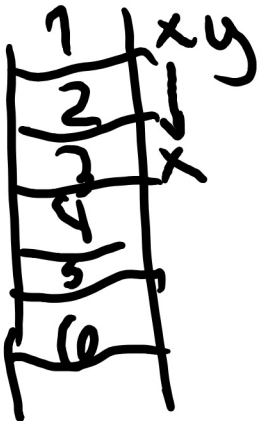

↑
add variable
in { }

literals
$$\{0, 1, \text{true}, \text{"help"}\}$$

↓ obvious value

python variables

↳ low numbers → set address for number values

$$\begin{aligned} x &= 1 \\ y &= 1 \\ x &= 3 \end{aligned}$$

vs
